

# Folders File Manager

Press-release  
February 21, 2023

Updated Oct 10, 2023

Folders File Manager is designed for users who recently transitioned from a PC as well as for those who have always missed a tree-style file manager on their Mac.

// When I changed my daily working environment from Windows to Mac, I was quite surprised to not find an Explorer-like file manager for macOS. For a newcomer, Finder seemed just a bit more confusing than I would prefer, so I strived to combine a familiar Explorer-like UX with the pleasing UI aesthetics of a native macOS app."

## Initial release date

February 21, 2023

## Distribution

Free to download, 14-day trial (offered since October 10, 2023)  
Lifetime license via in-app purchase.

## Price

~~USD 5.99 in the US.~~ (Phase 1 ended on May 1, 2023)  
USD 7.99 in the US.  
Corresponding tax-inclusive price (Tier 8) in other countries.  
Price is subject to change with future releases.

## Features

### **Everything, uncluttered:**

Get everything you'd expect from a file manager, with the most used functions brought to the top.

### **Easy navigation:**

Familiar from other operating systems, the folder tree feels right where it belongs.

### **Comprehensive undo:**

Undo any file operation including replacements and folder mergers.

### **Universal app:**

Runs natively on Apple Silicon.

### **Try before purchase:**

Fully functional free 14-day trial.

- Four consistently behaving views (Icons, List, Table, Gallery)
